# POLISHING TO PERFECTION

## Polishing Guide for Quilling with Silver

*Your piece is fired and you're ready for the finishing touches!  
Keep these pointers in mind to make your jewelry shine.*

### Tumbling Your Piece:

- POUR two pounds of stainless steel mixed shot into the chamber of your rotary tumbler
- FILL the chamber half to two-thirds full of water
- ADD a squirt of gentle dish soap
- LEAVE to tumble for a minimum of 1½ hours
- REMOVE and rinse your piece
- Now you're ready to add any final embellishments, such as pearls or stones

### Alternate Method:

- If you don't have a tumbler, you can use an agate burnisher to strengthen your piece
- Avoid brass or stainless steel brushes, as they may damage your piece
- Now you're ready to add any final embellishments, such as pearls or stones
